Beyond QE: The Economic Outlook

Prepared for the Georgia State
Economic Forecasting
Conference

Atlanta, GA

November 19, 2014

...the outlook for inflation is "arguably worse" than it was last December...

The Federal Reserve should be extraordinarily patient when it comes to raising interest rates..

...we might well move to rates rates sooner than thus far assumed...

...we're not behind the curve on rates.

Waiting too long to raise rates... is risky

...normalization could lead to some heightened financial volatility.

If all goes according to our forecast... the Federal Reserve will likely begin to raise its federal funds rate target ... sometime next year.

Monetary policymakers should remain patient in removing accommodation...

... low inflation.. is not enough to justify remaining at the lower bound.

...price-level targeting and nominal income targeting both imply easier monetary policy than what the Fed has used...

“Information received since the Federal Open Market Committee met in September suggests that economic activity is expanding at a moderate pace.”

**FOMC Statement
October 28, 2014**

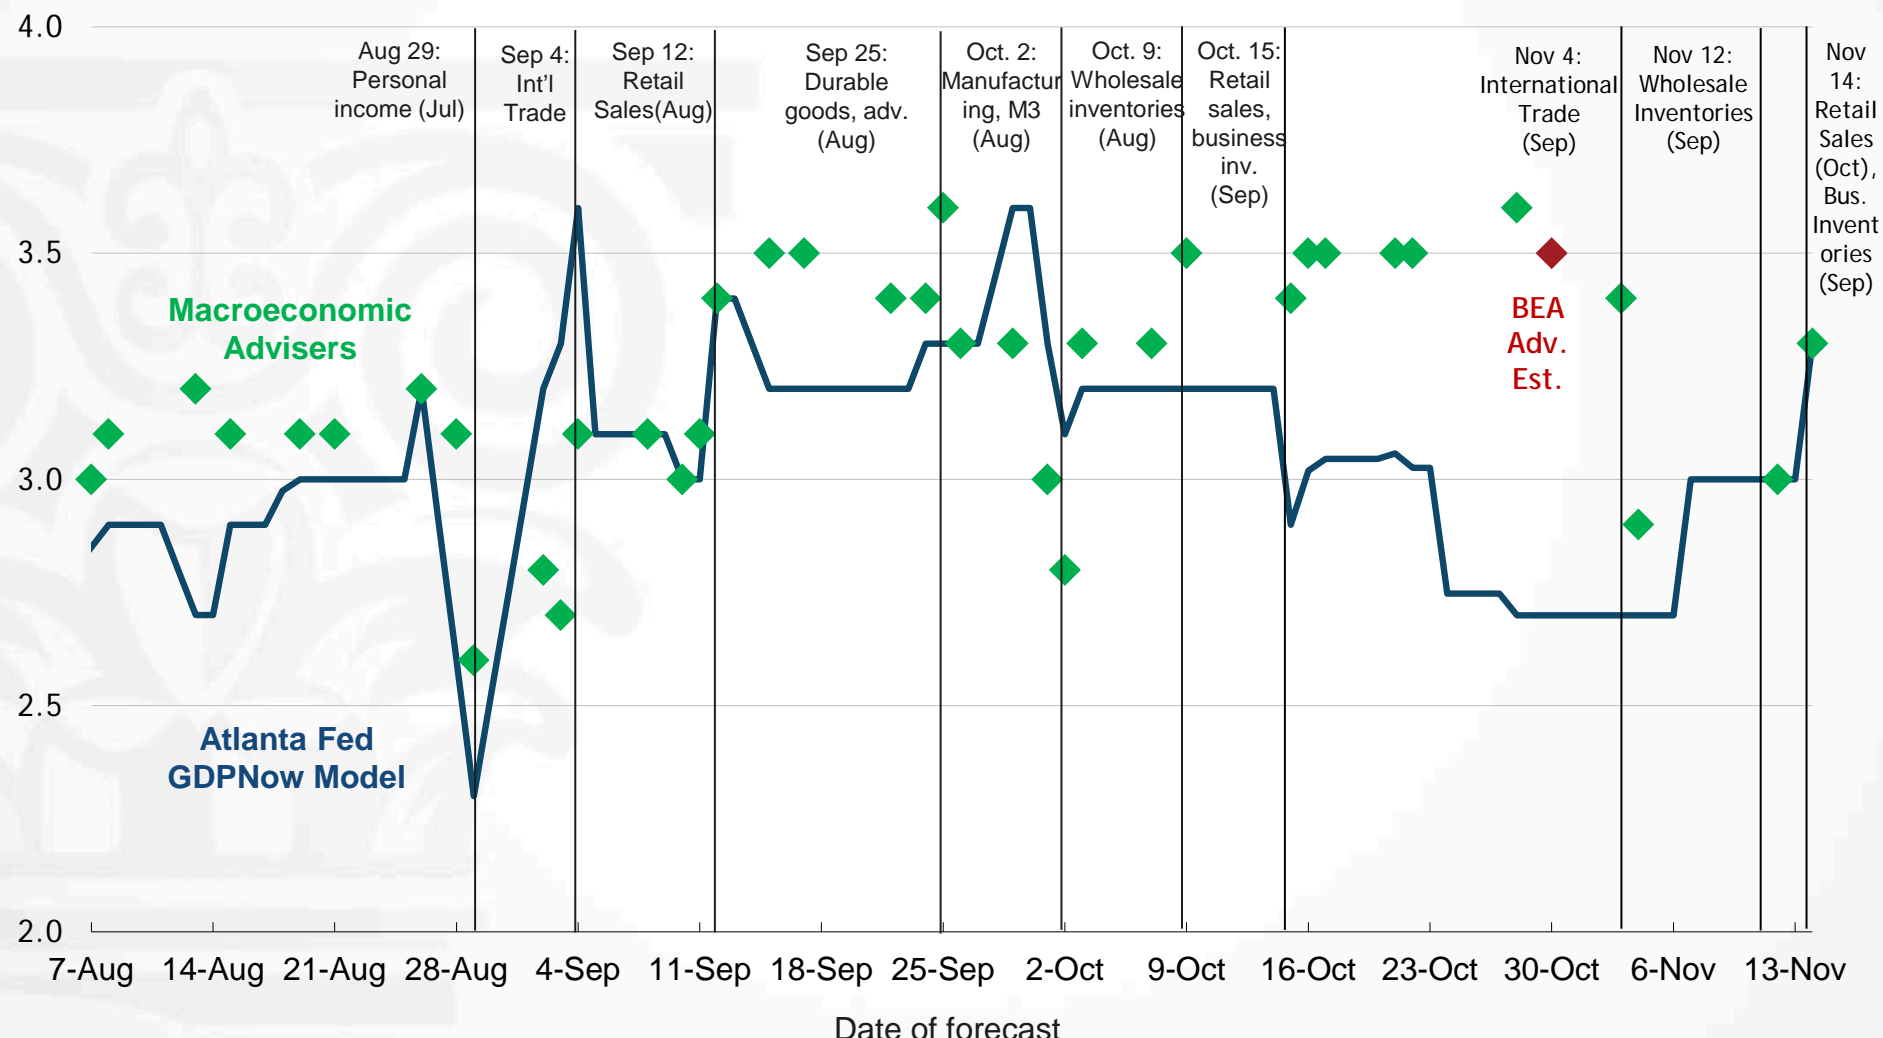

The numbers for the last 6 months look pretty good.

Annualized Real GDP Growth

| 2013 | 2014 Q1 | 2014 Q2 | 2014 Q3 |
|-------------|--------------------|--------------------|--------------------|
| 3.1 | -2.1 | 4.6 | 3.5 |

Current tracking estimates indicate the advance third quarter growth statistic is holding up...

through September 2014

“Labor market conditions improved somewhat further, with solid job gains and a lower unemployment rate.”

**FOMC Statement
October 28, 2014**

The trend in job growth has been rock solid, and drifting upward.

Unemployment rate projections have been persistently overly pessimistic.

“On balance, a range of labor market indicators suggests that underutilization of labor resources is gradually diminishing. ”

**FOMC Statement
October 28, 2014**

We view broader measures of unemployment as improved, but short of “mandate consistent.”

Civilian Unemployment Rate (U-3) vs. Broad Unemployment (U-6)

“Consistent with its statutory mandate, the Committee seeks to foster maximum employment and price stability. ”

**FOMC Statement
October 28, 2014**

We believe we are still short of the FOMC's mandate.

Progress Towards Objectives: U-3 gap versus U-6 gap
(Using Core PCE)

“...the Committee continues to see sufficient underlying strength in the broader economy to support ongoing progress toward maximum employment in a context of price stability.”
